

A Famous Victory

Quick Set Ups

A few players have commented that they miss a fixed set up to get into the game faster. We did not include such a fixed set up deliberately, there is simply no information available to provide the players with specific hexes where to set up their units. However, for all you time-pressed gamers, here are two set ups with fixed positions for Blenheim and Ramillies. A warning though: these set ups are neither historical nor particularly good! If you really want to feel the full flavor of early 18th century combat, you have to arrange the deployment of your troops yourself as well - it is part of the fun playing A Famous Victory.
