

All Quiet On The Western Front? Official Optional Set Up

The following rules are optional. They allow for a more historical set up. They also help balance the game for those who feel the Germans have an edge.

British (change) Ignore the second sentence of this section. There is no limit to the number of British infantry units that may start in non-Trench hexes provided every Trench hex from N3724 to N1318 contains a British infantry unit. All other set up rules apply.

French (change) Ignore the second sentence of this section. There is no limit to the number of French infantry units that may start in non-Trench hexes provided every Trench hex from S4117 to S2432 contains a French infantry unit, and all hexes from S2433 to S1039 must contain a French infantry unit or ZOC. All other set up rules apply.

German (change) The German player must place at least 17 Stoss Divisions in Strategic Reserve at the start of the game. All other set up rules apply.
