

Drive to the Baltic errata 1.0

- 1) The Soviet 5th Tank Corps mistakenly has a divisional size marking (xx) instead of a corps sized marking (xxx) on the 4 step counter (front and back).
- 2) Both the German Heavy Tank Bonus and the German StuG bonuses are missing from the Combat Modifiers Summary chart.
- 3) The Terrain Effects Chart listing for Combat Effects for Forest has the "No Bonus*" notation truncated down to "No".
- 4) A city symbol (for Duenaburg) should be in hex 4217.

Questions and Answers:

Q. The Combat Modifiers Chart Tactical Rating column for Minor River reads "halved". Is this correct, the rules' text do not suggest so?

A. Yes.

Q. If it is correct, does it apply to only attacks made exclusively across minor rivers (I assume) or to attacks made only partially across a minor river?

A. Only for attacks made exclusively across minor rivers.

Q. What do I do with the Allied and Axis 'Mulligan' counter?

A. We threw you a curve ball with that one! It can be used for any game, with the chit being exchanged (or used) whenever a player desires a new die roll. Make a roll to see who gets the Mulligan to begin the game (or provide it to the side with the initiative in games using that concept).

Cut out the city above and append it to your map.
